PROJECT OVERVIEW

Study Space is a student-facing academic app designed to help learners monitor academics, sports, extracurricular activities, and fee-related visibility in a single connected platform.

MVP TARGET – FRIDAY

Core Deliverable:

- Build an attendance tracking page for students.
- The screen should help users clearly understand attendance status and visibility.

Product Direction:

- Take inspiration purely from Android version patterns and familiar Android attendance UI flows.
- Follow Android-like readability, spacing, and interaction comfort.

UI Requirement:

- Attendance information should be easy to scan and understand.
- Use a clean, student-friendly, mobile-first layout.
- The first version should feel polished, useful, and easy to navigate.

DEVELOPER NOTES

- Prioritize instant attendance clarity.
- Keep the screen familiar for Android users.
- Use good spacing and clean data grouping.
- Build the layout so future academic widgets can be added easily.
